## TECHNICAL EXPERTISE

- **Programming Languages:** Java, Python, SQL, C, JavaScript (ES6+), HTML5, CSS3
- **AI/ML & Agents:** Building AI Agents (Automated Outbound Agents), XGBoost, Prophet, Data Annotation
- **Software Development:** FastAPI, Node.js, Express.js, RESTful APIs, JDBC, JWT Authentication, Git/GitHub
- **Databases & Tools:** MySQL, MongoDB Atlas, ServiceNow (CSA), Database Architecture, API Integration

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                           |
