EDUCATION

Marri Laxman Reddy Institute of Technology (MLRIT) <i>B.Tech in Computer Science – AI & Machine Learning CGPA: 8.97/10</i>	Hyderabad, IN 2023 – 2027
Sri Chaitanya Junior College <i>Class XII (Intermediate) – MPC Score: 97%</i>	Hyderabad, IN 2023
Vedha International School <i>Class X (SSC) Score: 10.0 GPA (100%)</i>	Kondapak, IN 2021

SKILLS SUMMARY

- **Programming Languages:** Java, Python, JavaScript (ES6+), SQL, C, HTML5, CSS3, Data Structures & Algorithms
- **AI/ML & Automation:** XGBoost, Prophet, Vapi (Voice AI), Twilio APIs, n8n Workflow Automation, Data Annotation
- **Backend Development:** FastAPI, RESTful APIs, JWT Authentication, JDBC, OOP, Git/GitHub
- **Databases & Tools:** MongoDB Atlas, MySQL, ServiceNow (CSA), API Integration, Database Design

WORK EXPERIENCE

CodeAlpha <i>Java Programming Intern</i>	Virtual Internship Aug 2025 – Sep 2025
• Developed Java applications by implementing OOP concepts – classes, inheritance, polymorphism, and encapsulation. • Built database-driven applications using JDBC and MySQL to perform CRUD operations and manage data efficiently. • Applied problem-solving skills to complete assigned projects; used Git and GitHub for version control and submission.	
StudentTribe <i>AI Data Annotation Intern</i>	Hyderabad, IN May 2025 – Aug 2025
• Annotated and labeled thousands of video frames according to predefined guidelines for training AI/ML models. • Maintained annotation consistency and quality standards to improve machine learning model performance. • Collaborated with the annotation team to meet project requirements and ensure data accuracy across datasets.	

TECHNICAL PROJECTS

AgriAdvisor – ML-Driven Crop Recommendation Live Demo GitHub	FastAPI, MongoDB, XGBoost
• Built an asynchronous FastAPI backend with MongoDB and secure JWT/bcrypt authentication for user management. • Trained an XGBoost classifier achieving 95% crop suitability accuracy using soil nutrients and climate parameters. • Integrated Prophet time-series forecasting to predict crop prices 30 days ahead, reducing Mean Absolute Error by 12%. • Implemented soil nutrient deficiency alerts (N-P-K) and runtime irrigation override logic for actionable recommendations.	
Digital Expense Management System GitHub	Node.js, Express.js, MongoDB
• Developed a full-stack personal finance application using Node.js, Express.js, and MongoDB with Mongoose ODM. • Built interactive data visualizations using Chart.js (pie/bar charts) to display spending trends and improve user engagement. • Implemented JWT-based authentication, security question recovery, and fixed session management vulnerabilities.	
GenAI Conversational Voice Agents Vapi, Twilio, n8n	
• Designed and deployed Recruitment and Slot Booking voice agents using Vapi to automate candidate screening workflows. • Integrated Twilio APIs for telephonic call routing and n8n automations to sync scheduling databases and calendars. • Reduced manual scheduling overhead by 40% through automated slot booking and real-time notification pipelines.	

CERTIFICATIONS & LANGUAGES

- **Certifications:** ServiceNow Certified System Administrator (CSA) | ServiceNow Certified Application Developer (CAD) | NPTEL Elite – Java Programming | NPTEL – Generative AI
- **Languages:** English (Professional), Hindi (Conversational), Telugu (Native)
